

**ENCLEAN®**

An emulsifiable concentrate (EC) containing 500 g/L (51.92% w/w) nonanoic acid

Causes serious eye irritation.  
Wash hands thoroughly after handling.  
Wear protective gloves, protective clothing and eye protection.  
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.  
If eye irritation persists: Get medical advice/attention.  
To avoid risks to human health and the environment, comply with the instructions for use

**WARNING**

IE/BPA 70760

Use biocides safely and sustainably.

It is illegal to use this product for uses or in a manner other than that prescribed on this label.

**Poison information:** for information or to report a poisoning incident contact the National Poisons Information Centre, Beaumont Hospital, Dublin (01-8092166), retain the label for reference.

**First aid instructions**

**Eye contact:** Immediately flush with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses if easy to do. Continue to rinse with tepid water for at least 10 minutes. Get medical attention if irritation or vision impairment occurs.

**Skin contact:** Remove contaminated clothing and shoes. Wash contaminated skin with water. Contact poison treatment specialist if symptoms occur.

**Ingestion:** Wash out mouth with water. Contact poison treatment specialist. Seek medical advice immediately if symptoms occur and/or large quantities have been ingested. Do not give fluids or induce vomiting.

**Inhalation of dust:** Remove victim to fresh air and keep at rest in a position comfortable for breathing. Seek medical advice immediately if symptoms occur and/or large quantities have been inhaled.

In case of impaired consciousness place in recovery position and seek medical advice immediately.

Keep the container or label available.

**Mode of action**

Enclean® is an algaecide containing nonanoic acid (51.92% w/w) with algaecide effects outdoors on buildings and building materials, on all hard surfaces in green spaces and on every roof type (except thatched roof) for use by professionals.

**Preparation of a mix for a knapsack based on Enclean®:**

The method of application for Enclean® is spraying.

Uses

Crops/Situations	Maximum individual dose (undiluted product)	Maximum number of applications (per year)
Green algae ( <i>Chlorophyta spp.</i> )	1.8 mL / m <sup>2</sup>	2

**Application method and application rate**

The product must be sprayed after dilution directly on the surfaces to be treated.

**Application rate:** 1.8 mL (undiluted product) / m<sup>2</sup>

The product should be diluted in water before application to obtain the recommended application rate.

**Operator protection**

During the filling and mixing process, facial exposure to splashes must be limited. The use of Personal Protective Equipment (PPE) and the application of technical and organisational Risk Management Measures (RMM) are required:

- Eye protection;
- Minimise splashes and spills;
- Minimise number of staff exposed.

**Storage:**

- Keep in a dry, cool, well-ventilated area.
- Keep in original container.

**Instructions for safe disposal of the product and its packaging**

- Dispose of unused product, its packaging and all other waste, in accordance with local regulations.
- Do not discharge unused product onto the ground, into water courses, into pipes (sink, toilets...) or down the drains.

**Instructions for use**

- Avoid direct or indirect contact with food and feed.
- Always read the label or leaflet before use and follow all the instructions provided.
- The diluted solution should be used immediately.
- Agitate during application
- Do not treat in rainy weather or on frozen surfaces.
- Do not clean the surface after treatment.
- Allow the product to take effect for at least several days.
- Users should report ineffective treatment to the registration holder.

**Risk mitigation measures**

- Product can only be used if the weather forecast shows no rain for the day of application.
- During application, the soil and plants adjacent to the treated area should be protected.
