Apply an even and complete cover, using any suitable sprayer.

Apply an even and complete cover, using any suitable sprayer; this should take 10 to 15 minutes. The tablet has completely dissolved before agitation before and during application. Ensure to the spray tank filled with clean water. Add the required number of GIBB 3 tablets. Preparation of spray liquid and spraying: Water volume: 110-120 l/ha

IMPORTANT: This information is approved as part of the Product Label. All instructions within this section must be read carefully in order to obtain safe and successful use of this product.

DIRECTIONS FOR USE

Gibberellic acid is a naturally occurring plant growth regulator which increases cell length, resulting in increased yield in many crops and often in the production of seedless fruit. To improve fruit set when blossom is sparse setting conditions are poor or where frost has killed the majority of the flowers. Either make a single application of 5-12 tablets per ha per year at 25% open flo

CROP SPECIFIC INFORMATION

PEARS
- Consult processor before using on crops for processing.
- Split application 80% of total dose at first application and 20% at second application.

Notes:
- Solutions of GIBB 3 are unstable and must be used immediately after preparation.
