

The all-season potato blight product

Application guidance

- Ranman Top is a suspension concentrate formulation containing 160 g/L cyazofamid
- Maximum individual dose 0.5 L/ha
- Maximum number of treatments 6 per crop
- Minimum interval between treatments is 5 days
- Latest time of application 7 days before harvest
- Water volume 200 - 400 L/ha
- Maintain a 7 day spray interval

Maximising the benefits of Ranman Top

- Ranman Top has been shown to provide foliar blight protection for a maximum of 7 days at the rapid canopy stage of haulm growth
- Ranman Top has excellent tuber blight activity (refer to Euroblight ratings)
- Rainfast in 15 minutes (onto a dry leaf)
- Ranman Top is a protectant fungicide with no curative activity. Therefore, under high blight pressure, always mix with a “kickback” product e.g cymoxanil
- Go to www.certisbelchim.co.uk for all tank mix compatibilities

SHAKE RANMAN TOP THOROUGHLY AND VIGOROUSLY BEFORE USE
